Address:	I-14/3, Islamabad, Pakistan	**LinkedIn:**	linkedin.com/in/aabdulrafay

Summary

I'm a curious and motivated learner, looking for a paid internship or job at a company that values innovation and growth. I enjoy working with modern software and keeping up with new technological trends. I'm someone who works well in a team, adapts quickly, and stays self-driven to get things done. My goal is to learn, grow, and add real value — while building something meaningful together with the organization.

Experience

Web Developer (Intern)
TechXpert — Islamabad, Pakistan | *Apr 2025 – Aug 2025* | *Hybrid*
- Worked on real-time web applications, bug fixes, and backend development (Node.js, JavaScript, TypeScript).
- Contributed to multiple backend projects, improving functionality and performance.

Web Developer (Intern)
DevRolin — Rawalpindi, Pakistan | *Jul 2025 – Aug 2025* | *On-site*
- Developed client projects in React with AI-integrated frontend features.
- Learned and applied Next.js for modern web applications.

Teaching Assistant
Riphah International University — Islamabad, Pakistan | *Aug 2024 – Present* | *Part-time, On-site*
- Assisted in PF, OOP, and AICT labs, helping students understand core concepts.
- Improved personal teaching skills through hands-on guidance.

Software Engineer (Intern)
XStak — Lahore, Pakistan | *Jul 2024 – Sep 2024* | *Remote*
- Built UI components for an e-commerce platform using JavaScript, HTML, and CSS.
- Worked on backend interaction, API integration, and user authentication.
